No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                       1 MKKYLFRAALYGIAAAILAA......KTTGYVWQLLPNGMKPEYRP 441
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Description
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Sequence 3
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Sequence Seq

Sequence 4, Application US/09581241A
Patent No. 6812012
GENERAL INFORMATION:
APPLICANT: HATTOIN, NORIAKI
APPLICANT: MURAKAM, SELJI
TITLE OF INVENTION: LUCIFERASE AND A METHOD FOR DETECTING INTRACELLULAR ATP USING THE

US-09-581-241A-4

```
Sequence 6, Application US/09581241A

Sequence 6, Application US/09581241A

Patent No. 6812012

GENERAL INFORMATION:
APPLICAMT: HATTORI, NORIARI
APPLICAMT: HATTORI, SELJI
ITILE OF INVENTION: LUCIFERASE AND A METHOD FOR DETECTING INTRACELLULAR ATP USING THE TITLE OF INVENTION: SAME
FILE REFERENCE: 193582US-3524-7126-0 PCT
CURRENT APPLICATION NUMBER: US/09/581,241A
CURRENT APPLICATION NUMBER: US/09/581,241A
CURRENT APPLICATION NUMBER: 1997/361022

Patent No. 5843746
Patent No. 5843746
GENERAL INFORMATION:
APPLICANT: TATSUM, HIROXI
APPLICANT: FUKUCHI, MAMORU
APPLICANT: KIKUCHI, MAMORU
APPLICANT: KIKUCHI, MAMORU
TITLE OF INVENTION: BIOTINYLATED FIREFLY LUCIFERASE, A GENE
TITLE OF INVENTION: PROCESS FOR PRODUCING BIOTINATED AND A BIOLUMINESCENT
TITLE OF INVENTION: ANALYSIS METHOD
NUMBER OF SEQUENCES: 14
CORRESPONDENCE ADDRESS:
ADDRESSEE: P.C.
STREET: 1755 S. JEFFERSON DAVIS HIGHWAY, FOURTH FLOOR
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Ø

Patent No. 5952636

GENERAL INFORMATION:
APPLICANT: Bachmaier, Kurt
APPLICANT: New M.D., Nikolaus
APPLICANT: New M.D., Nikolaus
APPLICANT: Penninger, Josef M.
TITLE OF INVENTION: Disease
FILLE OF INVENTION: Disease
FILLE OF INVENTION: Disease
FILLE OF INVENTION NUMBER: US/09/133,774B
CURRENT FILLING DATE: 1990-08-12
NUMBER OF SEQ ID NOS: 26
SOFTWARE: Patentin Ver. 2.0
    70,
                                                                                                                                                                                                                                                                                                                64,

Sequence 105. Application US/09286098

Sequence 105. Application US/09286098

Patent No. 6218371

GENERAL INFORMATION:
APPLICANT: Krieg, Arthur M.
APPLICANT: Weiner, George
TITLE OF INVENTION: Methods and Products for Stimulating the
TITLE OF INVENTION: Methods and Products for Stimulating the
TITLE OF INVENTION: Methods
TITLE OF INVENTION: Cytokines
TITLE OF INVENTION: Cytokines
TITLE OF INVENTION: Cytokines
TITLE OF INVENTION: Cytokines
STILE REPRENCE: C1039/7026/HCL
CURRENT APPLICATION NUMBER: US/09/286,098
CURRENT APPLICATION NUMBER: US 60/080,729
EARLIER FILING DATE: 1998-04-03
NUMBER OF SEQ ID NOS: 105

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    OTHER INFORMATION: synthetic oligonucleotide
NAME/KEY: misc_feature
LOCATION: (0)...(0)
COTHER INFORMATION: Has a phosphorothioate backbone.
US-09-082-649B-51

Sequence 42 Application US/09984365

Patent No. 673973

FRICAL INFORMATION:

APPLICANT: Diamond, Don J

TITLE OF INVENTION: IMMUNO-REACTIVE PEPTIDE CTL EPITOPES OF HUMAN CYTOMEGALOVIRUS

TITLE OF INVENTION: IMMUNO-REACTIVE PEPTIDE CTL EPITOPES OF HUMAN CYTOMEGALOVIRUS

FILE REFERENCE: 1954-384

CURRENT FILING DATE: 2002-33-13

FRIOR PLILING DATE: 2000-10-20

PRIOR PLILING DATE: 2000-10-20

GENERAL INFORMATION:
APPLICANT: ZEON CORPORATION
APPLICANT: ZEON CORPORATION
TITLE OF INVENTION: 6924135e1 DNA encoding Eimeria glyceroaldehyde-3-phosphate
TITLE OF INVENTION: dehydrogenase and uses thereof
FILE REFERENCE: GAPDH gene of Eimeria
CURRENT APPLICATION NUMBER: US/10/651,013
CURRENT PILLING DATE: 2003-08-29
NUMBER OF SEQ ID NOS: 14
SOCTHARE: Patentin Ver. 2.1
SEQ ID NO 14
LENGTH: 20
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequen

APPLICANT: Brainer, Robert L.
APPLICANT: Krieg, Arthur
ITILE OF INVENTION: Methods Related to Immunostimulatory
ITILE OF INVENTION: Methods Related to Immunostimulatory
ITILE OF INVENTION: Methods Related to Immunostimulatory
ITILE OF INVENTION: MOTORIER: US/09/672,126B
CURRENT PILING DATE: 1990-09-27
PRIOR APPLICATION NUMBER: 60/156,147
PRIOR PILING DATE: 1990-09-29
NUMBER OF SEQ ID NOS: 169
SOFTWARE: FastSEQ for Windows Version 3.0
SEQ ID NO 83
LENGTH: 20
TYPE: DNA
ORGANISM: Artificial Sequence
PRATURE:
PRATURE:
OTHER INFORMATION: Synthetic Oligonucleotide

Sequence 86, Application US/09895007A

Patent No. US20020165178A1

GENERAL INPORMATION:

APPLICANT: Schetter, Christian

APPLICANT: Petersen, Deanna M.

TITLE OF INVENTION: IMMUNOSTIMULATORY NUCLEIC ACIDS FOR THE

TITLE OF INVENTION: TREATMENT OF ANEMIA, THROMBOCTTOPENIA,

FILE REFERENCE: C1041/7014 (AWS)

CURRENT FILING DATE: 2001-06-28

PRIOR FILING DATE: 2001-06-28

NUMBER OF SEQ ID NOS: 133

SOFTWARE: FastSEQ for Windows Version 3.0
